

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-2 (canceled)

1 **Claim 3 (currently amended):** An image forming
2 apparatus ~~according to claim 2, comprising:~~
3 a main body for forming an image on a media;
4 a first media tray, detachably mounted to said main
5 body, for containing said media therein; and
6 a second media tray being formed integrally with said
7 first media tray, detachably mounted to said main body, and
8 able to contain said media therein,
9 wherein said second media tray is extendible from said
10 first media tray, and said second media tray is switchable
11 between a first state that said second media tray is housed
12 in said main body and a second state that said second media
13 tray is extended to outside of said main body and used for
14 directly setting media from outside of said main body into
15 said image forming apparatus;
16 wherein said second media tray is a manual insertion
17 tray which is extendible in multiple steps;

18 further comprising a transport roller which is
19 detachably mounted to said second media tray, and
20 transports said media placed on said second media tray.

1 **Claim 4 (currently amended):** An image forming
2 apparatus ~~according to claim 2,~~comprising:

3 a main body for forming an image on a media;

4 a first media tray, detachably mounted to said main
5 body, for containing said media therein; and

6 a second media tray being formed integrally with said
7 first media tray, detachably mounted to said main body, and
8 able to contain said media therein,

9 wherein said second media tray is extendible from said
10 first media tray, and said second media tray is switchable
11 between a first state that said second media tray is housed
12 in said main body and a second state that said second media
13 tray is extended to outside of said main body and used for
14 directly setting media from outside of said main body into
15 said image forming apparatus;

16 wherein said second media tray is a manual insertion
17 tray which is extendible in multiple steps;

18 wherein said main body includes a door being openable,
19 and said first media tray includes a lock pin which
20 prohibits said door from opening when said second media
21 tray extends to outside of said main body, and permits said

22 door to open when said second media tray is housed in said
23 main body.

1 **Claim 5 (previously presented):** An image forming
2 apparatus according to claim 3, wherein said main body
3 includes a door being openable, and said first media tray
4 includes a lock pin which prohibits said door from opening
5 when said second media tray extends to outside of said main
6 body, and permits said door to open when said second media
7 tray is housed in said main body.

Claims 6-7 (canceled)

1 **Claim 8 (currently amended):** An image forming
2 apparatus ~~according to claim 2, comprising:~~
3 a main body for forming an image on a media;
4 a first media tray, detachably mounted to said main
5 body, for containing said media therein; and
6 a second media tray being formed integrally with said
7 first media tray, detachably mounted to said main body, and
8 able to contain said media therein,
9 wherein said second media tray is extendible from said
10 first media tray, and said second media tray is switchable
11 between a first state that said second media tray is housed
12 in said main body and a second state that said second media

13 tray is extended to outside of said main body and used for
14 directly setting media from outside of said main body into
15 said image forming apparatus;

16 wherein said second media tray is a manual insertion
17 tray which is extendible in multiple steps;

18 wherein said main body includes a door being openable,
19 said first media tray includes a movable pin, when said
20 second media tray is extended to outside of said main body,
21 said movable pin engaging with and stopping said door at a
22 position where said door is closed, when said second media
23 tray is housed in said main body, engagement of said door
24 with said movable pin is removed.

1 **Claim 9 (original):** An image forming apparatus
2 according to claim 3, wherein said main body includes a
3 door being openable, said first media tray includes a
4 movable pin, when said second media tray is extended to
5 outside of said main body, said movable pin engaging with
6 and stopping said door at a position where said door is
7 closed, when said second media tray is housed in said main
8 body, engagement of said door with said movable pin is
9 removed.

1 **Claim 10 (original):** An image forming apparatus
2 according to claim 4, wherein when said lock pin prohibits
3 said door from opening, said lock pin prohibits said first

4 media tray from separating from said main body, when said
5 lock pin permits said door to open, said lock pin permits
6 said first media tray to separate from said main body.

1 **Claim 11 (original):** An image forming apparatus
2 according to claim 8, wherein when said second media tray
3 is extended to outside of said main body, said movable pin
4 engages with said main body, and when said second media
5 tray is housed in said main body, engagement of said
6 movable pin with said main body is removed.

1 **Claim 12 (original):** An image forming apparatus
2 according to claim 4, wherein said door is a jam removal
3 door for removing said media jammed in said main body.

Claims 13-17 (canceled)

1 **Claim 18 (original):** An image forming apparatus
2 according to claim 5, wherein said door is a jam removal
3 door for removing said media jammed in said main body.

1 **Claim 19 (previously presented):** An image forming
2 apparatus according to claim 25, wherein said door is a jam
3 removal door for removing said media jammed in said main
4 body.

1 **Claim 20 (previously presented):** An image forming
2 apparatus according to claim 26, wherein said door is a jam
3 removal door for removing said media jammed in said main
4 body.

1 **Claim 21 (original):** An image forming apparatus
2 according to claim 8, wherein said door is a jam removal
3 door for removing said media jammed in said main body.

1 **Claim 22 (original):** An image forming apparatus
2 according to claim 9, wherein said door is a jam removal
3 door for removing said media jammed in said main body.

1 **Claim 23 (original):** An image forming apparatus
2 according to claim 10, wherein said door is a jam removal
3 door for removing said media jammed in said main body.

1 **Claim 24 (original):** An image forming apparatus
2 according to claim 11, wherein said door is a jam removal
3 door for removing said media jammed in said main body.

1 **Claim 25 (currently amended):** An image forming
2 apparatus comprising:
3 a main body for forming an image on a media;

4 a first media tray, detachably mounted to said main
5 body, for containing said media therein; and
6 a second media tray being formed integrally with said
7 first media tray, detachably mounted to said main body, and
8 able to contain said media therein,
9 wherein said second media tray is extendible from said
10 first media tray, and said second media tray is switchable
11 between a first state that said second media tray is housed
12 in said main body and a second state that said second media
13 tray is extended to outside of said main body, and
14 wherein said main body includes a door being openable,
15 and said first media tray includes a lock pin which
16 prohibits said door from ~~closing~~opening when said second
17 media tray extends to outside of said main body, and
18 permits said door to open when said second media tray is
19 housed in said main body.

1 **Claim 26 (previously presented):** An image forming
2 apparatus comprising:

3 a main body for forming an image on a media;
4 a first media tray, detachably mounted to said main
5 body, for containing said media therein; and
6 a second media tray being formed integrally with said
7 first media tray, detachably mounted to said main body, and
8 able to contain said media therein,

9 wherein said second media tray is extendible from said
10 first media tray, and said second media tray is switchable
11 between a first state that said second media tray is housed
12 in said main body and a second state that said second media
13 tray is extended to outside of said main body, and
14 wherein said main body includes a door being openable,
15 said first media tray includes a movable pin, when said
16 second media tray is extended to outside of said main body,
17 said movable pin engaging with and stopping said door at a
18 position where said door is closed, when said second media
19 tray is housed in said main body, engagement of said door
20 with said movable pin is removed.
